Get Back 30 Minutes for Every 60 you Spend on SQL backup.

Speed Up Your Native Backups with LiteSpeed® for SQL Server.

Improve your backup time by as much as 75% over native SQL. That's up to 2 Terabytes of data backed up in under 1 hour. Translating into more than 180 hours over the course of a year.

LiteSpeed for SQL Server uses native Server APIs and innovative data compression to accelerate your backup time. You can even implement LiteSpeed with your existing native SQL scripts. No need to rewrite or test code.

Less time for backups. Better performance from native SQL Server. That's LiteSpeed from Quest Software.
