

Looking to add Managed Cloud Services without giving up margin? With Xterity you can do both.

Developed exclusively for the reseller community, Xterity enables you to:

- Deploy enterprise class cloud services to end users with **no up-front** capital or ongoing management costs
- Deliver **higher SLAs** than competing cloud services providers
- Earn the margins you need to ensure **profitable**, recurring revenue streams

With Xterity there is no minimum sales commitment. As a wholesale cloud services provider you brand our cloud as your service, setting your own prices and margins.

Xterity is built on Egenera Cloud Suite, an award-winning cloud orchestration platform that enables users to quickly **create and manage** scalable, secure and highly reliable private, public and hybrid cloud services.

So if you're looking to add managed cloud services but don't want to give up margin you have only two possible choices...

Xterity. Or everyone else.
